Welche API?

Akzeptierte
Formate
???

Load
function

API call
(generic)

Adjustability
(dynamic view)
customizable

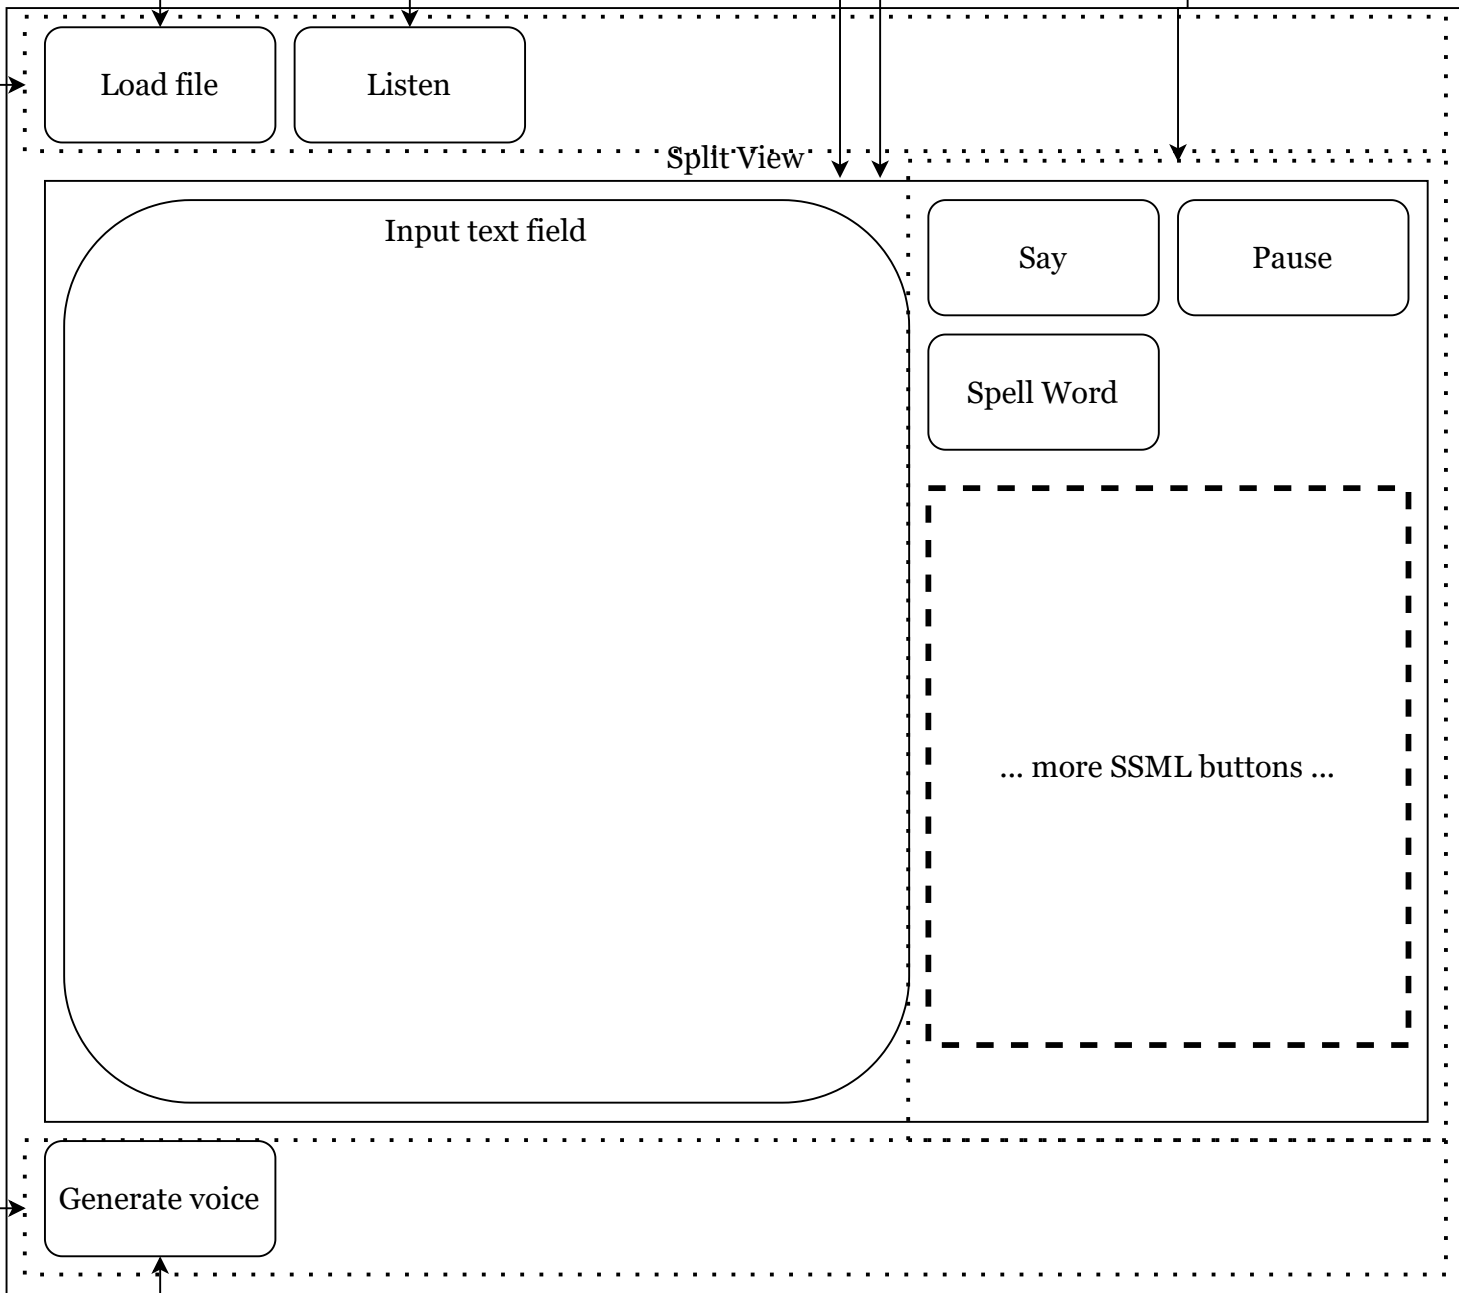

Undefined
functionalites
for
assistability
(eye tracking,
cursor
movement, ...)

UI Design for
User input
of SSML
functionality

SSML
Generation
with varying
parameters
(semi-generic)

SSML
Builder
or
Factory

How do we
handle the
varying input
parameters for
different SSML
functionality

Basic application
functions
(exit, minimize,
maximize, settings
window)

UI Shortcuts
(Tieable to ANY
user input element -
i.e. button and text
field)

Needs further
specification

MVP
UI elements
(Input field, button,
toolbar, layout
...)

Toolbars
with
varying
functionality
(components)

Generate voice

API call
(generic)

Speech Jokey Application
